Comfort, Respect & Dignity at Longview at Bowman Place

Compassionate Care at Longview

At Bowman Place we realize how challenging it can be to find the right residence for a loved one who needs memory care. Longview at Bowman Place is composed of two secure memory care neighborhoods specifically designed for people with Alzheimer's and other memory challenges. They have been thoughtfully designed to provide resident independence and a sense of community. At Longview, we have created a safe, positive, residential environment with the very best in memory care services.

Private bedroom and bath suites are designed to be safe and supportive.

The neighborhoods feature inviting living and dining areas and a cozy country kitchen intended for resident engagement as they would in their own home. One of the features of Longview is a spacious enclosed garden with benches and a walking path where fresh air, beautiful flowers, and sunshine lift the spirits. Everything at Longview has been carefully planned to provide an enriching environment with optimum safety and security.

Personal Care When You Need It

Our exceptional staff is available around the clock to provide personal and health care needs, dressing assistance, and medication supervision. Because we are equipped to handle both personal and medical needs,

families get the added benefit of peace of mind that their loved one is in capable professional hands.

Breakthrough Memory Care Therapy

In addition to receiving assistance and support with daily personal care tasks, residents can also benefit from our award-winning Behavior-Based Ergonomics Therapies (BBET) memory care program. BBET is truly a Person-Centered Care therapy

designed to help our associates enhance the dignity and quality of life for those living with Alzheimer's and other forms of dementia. We are proud to be the only community in New Hampshire with this therapy, and we offer it at no additional charge.

The BBET program at Bowman Place consists of four therapies customized to each individual resident's interests and capabilities. These therapies include:

- Music Therapy
- Curated Video Therapy
- Stimulating Therapy
- Memory Prop Therapy
